Cashier

Customer service.
Checkout supervision.

Basingstoke, UK

INTERESTS AND SKILLS

In my spare time I enjoy working on the open source project ScummVM(<http://www.scummvm.org>). I have supplied patches to the project for the SCUMM engine which runs Lucasarts point and click adventure games. These patches have made it into the main program. I have also worked upon the ScummVM Teen Agent engine, which is a re-implementation of a classic Polish adventure game, implementing some of the game play features.
